

# Propane Matters

## in New York

7952-16617

### Outdoor living made easy

To give you a better idea about how **"propane can do that,"** take a look at some of your options for taking propane outdoors.

**Grill it up.** Propane grills light instantly, heat faster than charcoal, and emit less carbon monoxide and soot. They make your food taste better too! Higher-end grills offer drawers, side burners, surface lighting and LED temperature displays.

**Roast it up.** People are taking cooking to new levels by adding cooktops, ovens and rotisseries to their deck or patio. These outdoor kitchens can be fueled by a portable propane cylinder or through your home's primary propane tank.

**Warm it up.** Take the chill out of the night air with portable heaters and outdoor fireplaces, which can raise outdoor temperatures by as much as 30 degrees. Portable outdoor heaters include a safety feature that immediately shuts down the heater if it gets knocked over.

**Light it up.** Both portable and fixed propane lighting is available in many different styles that combine Old World design and charm with modern energy efficiency.

## Propane can do that.

### Customer warms up to \$250 furnace rebate

After getting a service check on her propane furnace last fall, Deana Roman of Lowman, NY learned from her propane company that her heating system needed to be replaced.

*"I had asked them to get it ready for the season but it turned out my furnace was inoperable," says Deana, "I had the new furnace in my home the following week, just in time for the cold weather. They worked on it well after business hours, made sure it worked properly before they left and even installed a new thermostat and programmed it for me."*

Deana says she was thrilled when she learned that she qualified for a **\$250 rebate** for replacing her old propane furnace with a new one.

*"The whole rebate process went smoothly and I was amazed at how fast the rebate came to me—in just a few weeks. That extra \$250 helped me a great deal. I've also seen a difference in the number of gallons of propane that I use because of the new furnace. So I've saved in more ways than one."*

## You may qualify for a rebate too!

Whether it's a new propane furnace, boiler or water heater,

you have options for smart improvements that will enhance your lifestyle, improve your comfort and save you money. And you may qualify for rebates as high as **\$400!**

#### NY Propane Rebates:

<b>Water Heater</b>	<b>\$300</b> for converting from another fuel
	<b>\$150</b> for replacing an existing propane unit
<b>Boiler/ Furnace</b>	<b>\$400</b> for converting from another fuel
	<b>\$250</b> for replacing an existing propane unit

Please visit [PropaneNewYork.com](http://PropaneNewYork.com) to learn more about your rebate opportunities in 2019.

## Healthier rides for our kids

Today, nearly one million students in school districts across the country get to school in a bus powered by propane autogas—a testament to the safety, reliability, cost effectiveness, and eco-friendly nature of propane as a motor fuel.

For New York's part, our state already has more than 600 of these "green" buses on the road. Research shows that 5.5 million pounds of NOx emissions could be reduced **per year** if new propane-powered buses replaced the state's 14,930 diesel buses that are older than the 2007 model year.\*

School districts in New York and across the country have also gained enormous fuel savings by using propane autogas instead of diesel fuel. Propane historically costs less than diesel per gallon and reduces maintenance costs due to its clean-operating properties.

# WIN a **FREE** propane tank fill-up

**Read the articles in this newsletter** and then go to

[PropaneNewYork.com/contest](http://PropaneNewYork.com/contest) and answer three questions correctly. If you do, we'll enter you in a drawing to win a **FREE** propane tank fill-up—up to 400 gallons!

No purchase necessary. A purchase will not improve chance of winning. Employees of NYPGA, its affiliates, agencies or vendors may not enter. Contest is open to New York State property owners. One entry per household. Drawing will take place on or around 6/30/19.

**Congratulations to the winners of the Rinnai Tankless Water Heater: Edith Chance of Cohocton, NY and Marco Sterling of Cairo, NY.**

## Propane's supply advantage

**People like heating** their home and water with propane because they know they will have a reliable supply of propane on hand whenever they need it. Having a propane tank on their property gives them the ability to safely store a plentiful supply that's always ready for immediate use.

Natural gas customers don't enjoy the same type of security, as recent events have shown. If an underground natural gas pipeline gets damaged—or other problems occur—hundreds and even thousands of customers may lose their

supply until repairs get done. Problems with underground pipelines can also result in property damage and even fatalities, as we saw last summer in Massachusetts.

Propane has a distinct edge over natural gas because of the way it's transported and stored. After propane gets compressed into a liquid, all of this liquid petroleum gas (LPG) gets stored inside large tanks until it's delivered to the on-site supply tank at a home or business.

Visit [PropaneNewYork.com](http://PropaneNewYork.com) to read more about propane vs. natural gas.

## Remodeling plans?

**Spring is the most popular time**

to put your remodeling plans into action and your propane company would love to help! They'll be glad to show you how **propane can do that**, so you can take advantage of propane's versatility and efficiency to make improvements that will be the talk of the neighborhood.
